

**Rules: No Talking. Eyes on your own work. Direct all questions to monitors.**

- You should have your tools (knife, wire cutters) with you. Rulers are NOT allowed.
- A bundle of flowers is on the table and contains all the fresh materials required to complete both your designs. You will be instructed as to what flowers are to be used for each. You will have three (3) minutes to review the flowers provided prior to the start time. You will not be given any additional flowers once testing begins.
- If you finish before the allotted time has passed, quietly clean your table and pack your belongings. Leave your designs along with your exam grade sheet on your design table. Monitors will move them to the designated area outside the room.
- If you are not finished in one hour, STOP working immediately when the monitor announces time is up. You will be graded based on what you have completed.
- We encourage you to take pictures of your designs before you turn them into the officials.

**Boutonniere**  
**1 Rose, 1 Leather Leaf, Wire, Corsage Tape**

	10	9	8	7	6	5	4	3	2	1	Points
<b>Taping</b>	Shows high quality of design. Taping is clean, tight and smooth. All wire is covered. End of stem is properly covered. Needs little or no improvement.			Taping is not uniformly smooth or tight. Wire is exposed at or below calyx or along stem. Needs improvement.				Taping is loose or flagging. Stem end not covered by tape. Wire exposed at stem end. Needs much improvement.			
<b>Wiring of Calyx</b>	Calyx is pierced and wired properly. Needs little or no improvement.			Calyx is not pierced and wired properly. Needs improvement.				Calyx is not wired. Needs much improvement.			
<b>Wiring of Stem</b>	Correctly wired. No wire is seen or felt. Wire is not coiled around stem. Needs little or no improvement.			Stem is incorrectly wired. Wire is coiled around stem. Wire is easily felt. Needs improvement.				Stem is not wired. Wire extends past stem end. Needs much improvement.			
<b>Foliage</b>	Leather leaf is only foliage used. Should be proportionate to overall design. If wired (not necessary), this is done properly. Needs little or no improvement.			Foliage is too long or large. Foliage is too small or short. If wired (not necessary), this is done improperly. Needs improvement				Foliage is absent. Foliage other than leather leaf is used. Needs much improvement			
<b>Overall Visual Appeal &amp; Likeability</b>	Attractive boutonniere. Stem length is desired length of 1 ½ to 2 ½ inches. Damaged or unattractive petals removed. Damaged sepals are trimmed or removed. Best front view of rose is utilized. Desirable quality workmanship. Needs little or no improvement.			Incorrect stem length. Best front view of rose is not utilized. Damaged or unattractive petals present. Damaged sepals present. Needs some work before it is salable. Incomplete design.				Stem length is not proportionate. Front view of rose is undesirable. Many indicators of poor workmanship. Not salable as is. Needs much improvement.
